7. **NPN Warnings** (Indicate with an X if applicable) (to be printed on the Labels)

Applicable to all farm feeds containing a NPN source:

1. Vinegar is an effective remedy against NPN poisoning. Mix with equal amount of water. Dose: Half a bottle per calf or large sheep or 2 to 4 bottles per head of cattle (1 bottle = 750 ml)
2. Protect this farm feed against rain. NPN is soluble and animals drinking such a solution could be poisoned.
3. Do not feed this farm feed indiscriminately with other NPN containing farm feeds. Consult an animal scientist

Concentrates containing a NPN source:

4. Mix this concentrate thoroughly with the prescribed ingredients.

Finisher feeds containing a NPN source:

5. Adaptation: Limit the intake of the finisher feed to approximately 1% of the animals' live mass during the first week in order to prevent digestive disorders.
6. Finisher feeds are fed with adequate roughage or natural grazing. Feeding troughs must always be kept filled.

Complete feeds containing a NPN source:

7. During the first week additional roughage must be fed to facilitate adaptation.
8. This farm feed must be fed *ad libitum* Ensure that the feed troughs are always full.

Animal licks containing a NPN source:

9. This is a supplement and not a feed. Sufficient grazing and / or roughage must be available at all times.
10. Keep the lick troughs filled and prevent gluttonous eating by hungry animals. A constant daily intake can help to prevent poisoning.
11. Before feeding a NPN containing lick, feed an ordinary salt/phosphate lick for at least 7 days.

Dairy meals containing a NPN source:

12. Adaptation: When changing from a NPN-free dairy meal, to a NPN-containing meal, it is advisable to feed a 50/50 mixture for 4 to 6 days, before switching completely over to the new meal.
13. Dairy meal must be fed 2 or more times daily.
14. The quantity of dairy meal fed will depend on the quality and quantity of the available grazing and/or roughage.
