**7. DETAILED REASONS WHY SUCH ALTERATION, MODIFICATION OR AMENDMENT IS SOUGHT:**

The license currently makes provision for ab initio and advanced flight training on a flight simulator and seven (7) types of aircraft.

The training demand from aircraft operators, aircraft owners and freelance pilots coupled with the wide variety of aircraft types being operated in Namibia necessitates that the W.F.T.C expands its training services offered to include a wider spectrum of aircraft than those listed on the Air Services License.

In terms of the legislation, the operator of a small or large aero plane is required to establish and maintain a ground and flight training for crew members employed by such operator and that such training be provided by an approved aviation training organization such as (amongst others) the W.F.T.C. has recently concluded training agreements with Sefofane Air Charters, Wings Over Africa, Namibia Commercial Aviation and Desert Air. Other training agreements are in the process of being finalized.
