### MINISTRY OF LAND REFORM

No. 196

2015

#### TARIFF OF FEES CHARGEABLE BY PROFESSIONAL LAND SURVEYORS: PROFESSIONAL LAND SURVEYORS': TECHNICAL SURVEYORS' AND SURVEY TECHNICIANS' ACT, 1993

Under section 31(1)(n) of the Professional Land Surveyors', Technical Surveyors' and Survey Technicians' Act, 1993 (Act No. 32 of 1993), and after consultation with the Namibian Council for Professional Land Surveyors, Technical Surveyors and Survey Technicians, I have -

- (a) made the regulations prescribing the tariff of fees as set out in the Schedule; and
- (b) repealed Government Notice No. 124 of 28 July 2011.

**U. NUJOMA**  
**MINISTER OF LAND REFORM**

Windhoek, 29 July 2015

## SCHEDULE

## ARRANGEMENT OF REGULATIONS

1. Definitions
2. Basic area fees
3. Location and replacement of beacons
4. Official co-ordinate values
5. Remaining extent
6. Definition of a given area
7. Connections
8. Curvilinear boundaries
9. Diagrams, endorsements and prints
10. General plans
11. Servitudes
12. Travelling, transport and subsistence
13. Line clearing
14. Abnormal circumstances
15. General

**Definitions**

1. In these regulations a word or an expression to which a meaning has been assigned in the Professional Land Surveyors', Technical Surveyors' and Survey Technicians' Act, 1993 (Act No. 32 of 1993) and the Land Survey Act, 1993 (Act No. 33 of 1993) has that meaning.

**Basic area fees**

2. (1) Subject to subregulations (2) and (3), a land surveyor must charge the fees specified in Column 2 -

(a) of Table A, for the work done by that land surveyor per area in square metres, for the relevant number of pieces of land specified in Column 1 of that Table; or

(b) of Table B, for the work done by that land surveyor per area in hectares specified in Column 1, for the relevant number of pieces of land specified in Column 2 of that Table.

(2) For purposes of Table A -

(a) if the number of pieces of land to be surveyed exceeds a number specified in Column 1, other than 1 000, but not the next higher number specified, the land surveyor must charge, for the work done per area in square metres, the fee specified in Column 2 -

(i) for that specified number which is exceeded; and

(ii) which is proportional to the number of pieces of land specified in Column 1 for the number of pieces of land exceeding the number contemplated in subparagraph (i).

(b) if the number of pieces of land exceeds 1 000, the land surveyor must charge, for the work done per area in square metres, the fee specified in Column 2 -

(i) for 1 000 pieces of land; and

- (ii) for each additional piece of land which exceeds the pieces contemplated in subparagraph (i).
- (c) a fraction of a square metre is considered to be a full square metre.

**TABLE A**Fees for the survey of pieces of land up to 20 000 m<sup>2</sup> in extent

<b>COLUMN 1</b>	<b>COLUMN 2</b>						
Number of pieces of land	Fee for each piece of land according to area in square metres						
	300 or less	301 to 400	401 to 600	601 to 1 000	1 001 to 1 500	1 501 to 4 000	4 001 to 20 000
	N\$	N\$	N\$	N\$	N\$	N\$	N\$
1	5 746	6 415	6 720	7 195	7 765	8 755	8 869
2	3 876	4 337	4 578	4 906	5 263	5 514	5 926
3	2 916	3 257	3 462	3 743	4 092	4 517	4 874
4	2 558	2 861	3 056	3 307	3 604	3 928	4 212
5	2314	2 603	2 792	3 056	3 289	3 575	3 811
10	1 872	2 135	2 264	2 440	2 702	3 127	3 350
20	1 681	1 922	2 040	2 221	2 437	2 804	3 064
50	1 363	1 634	1 789	1 990	2 221	2 581	2 792
100	1 241	1 544	1 698	1 922	2 124	2 509	2 722
250	1 066	1 403	1 555	1 789	1 973	2 472	2 671
500	864	1 217	1 378	1 620	1 831	2 430	2 588
1 000	738	1 104	1 292	1 518	1 720	2 386	2 538
Each additional piece more than 1 000	673	1 004	1 177	1 404	1 598	2 245	2 386

**TABLE B**

Fees for the survey of pieces of land more than 2 ha in extent

<b>COLUMN 1</b>	<b>COLUMN 2</b>					
Areas of pieces of land in hectares	Fee for each piece of land according to number					
	one	two	three	four	five	More than five
	N\$	N\$	N\$	N\$	N\$	N\$
More than 2 but not more than 5	9 839	7 206	6313	5 849	5 575	4 376
More than 5 but not more than 10	10 361	7 758	6 880	6 422	6 142	4 945
More than 10 but not more than 25	10 878	8 329	7 465	7 009	6 731	5 537
More than 25 but not more than 50	11 371	8 905	8 057	7 606	7 319	6 120
More than 50 but not more than 100	11 886	9 438	8 596	8 158	7 886	6 698
More than 100 but not more than 200	13 279	11 026	10 256	8 611	8 611	8 611
More than 200 but not more than 300	14 694	12 402	11 502	9 324	9 324	9 324
More than 300 but not more than 500	16 063	13 499	12 438	10 033	10 033	10 033
More than 500 but not more than 750	17 470	14 608	13 388	10 753	10 753	10 753
More than 750 but not more than 1 000	18 874	15 659	14 332	11 462	11 462	11 462
More than 1 000 but not more than 1 500	20 268	15 328	15 328	15 328	15 328	15 328

More than 1 500 but not more than 2 000	21 646	16 308	16 308	16 308	16 308	16 308
More than 2 000 but not more than 3 000	23 053	17 312	17 312	17 312	17 312	17 312
More than 3000 but not more than 5 000	24 450	18 280	18 280	18 280	18 280	18 280
More than 5 000 but not more than 7500	25 834	19 270	19 270	19 270	19 270	19 270
More than 7 500 but not more than 10 000	27 222	20 236	20 236	20 236	20 236	20 236
More than 10 000 hectares	The fees in the last row of Table B plus N\$1 003 for every additional 1 000 hectares or part of it.					

- (3) The fees prescribed in subregulation (1) -
- (a) include, subject to the other provisions of these regulations, the costs of -
- (i) supplying survey records in terms of these regulations;
  - (ii) a reasonable amount of additional computation to verify the positions of the beacons of the land under survey;
  - (iii) preparing and supplying prescribed reports and certificates;
  - (iv) preparing, lodging with the Surveyor-General and supplying diagrams and general plans in the form and number prescribed for registration, but if a general plan consists of ten or less figures the fee which may be charged for that general plan is as set out in regulation 10;
  - (v) supplying and erecting new beacons and permanently marking main survey stations;
  - (vi) preparing and supplying any agreement regarding beacons as may be required, but may not include obtaining the signatures of land owners on that agreement;
  - (vii) locating and verifying existing beacons, stations and reference marks where the beacons, stations and reference marks have not been destroyed, obliterated or covered;
  - (viii) basing the survey on trigonometric stations and reference marks;
  - (ix) testing the alignment of existing beacons when terminals do not have to be fixed, but excluding replacing beacons on line;
  - (x) placing new beacons on an existing boundary;
  - (xi) pointing out beacons and boundaries in the course of field work;
  - (xii) transport in the course of field work;
  - (xiii) supplying normal labour;
  - (xiv) reasonable time devoted to receiving and perusing instructions for the survey; and

- (xv) the replacement value of equipment.
- (b) are, for each piece of land of 20 000 square metres or less which is a regular figure, the fees prescribed in Table A in subregulation (1), but are reduced by 10 percent for those regular figures exceeding 10 in number, but the 10 regular figures to which the reduction does not apply must be the smallest regular figures;
- (c) may not be reduced only for the reason that diagrams are not required for registration;
- (d) must be increased by N\$191 per beacon if it is necessary to embed the centre-mark of a beacon in concrete;
- (e) must be increased by N\$229 per beacon if a beacon consists of an iron standard weighing approximately three kilograms per metre or a 20 millimetre iron peg or galvanised iron pipe at least 600 millimetres long, driven in vertically and projecting not more than 150 millimetres above the surface of the ground;
- (f) must be increased by N\$539 per beacon if the beacon consists of a solid stone or concrete block, 900 millimetres in length and 225 square centimetres in cross-section, firmly planted in the ground to a depth of at least 600 millimetres;
- (g) must be increased by N\$85 per witness mark if in the survey of rural land two or more witness marks are placed in respect of each beacon, which witness marks must consist of 10 millimetre iron pegs 450 millimetres long, driven in below the surface of the ground and at a distance of approximately 5 metres from the beacon and along the boundaries meeting at that beacon;
- (h) must be increased by N\$373 for each abutting erf, for each straight dividing wall of a dwelling which forms a common boundary;
- (i) must be increased by N\$749 for each abutting erf, for each staggered dividing wall of a dwelling which forms a common boundary;
- (j) must be increased by N\$136 for each servitude endorsement on a set of diagrams or general plans;
- (k) must be increased by N\$136 for each component clause of a set of consolidated diagrams prepared by a land surveyor;
- (l) must be increased by N\$616 for the second and each subsequent property surveyed if a number of properties represented on separate diagrams are surveyed for subdivisional or servitude purposes;
- (m) for the survey of additional boundaries exceeding six in number must be increased by 10 percent for each of ten such additional boundaries and thereafter by 5 percent for each further additional boundary, but the line joining an unbeaconed point with an indicative beacon is not considered to be a boundary for the purpose of these regulations; and
- (n) for the survey of more than one piece of land, in a township must be increased by 25 percent for each piece of land which is -
- (i) larger than 4 000 square metres;
- (ii) entirely surrounded by roads; and

(iii) not subdivided into erven.

(4) If a land surveyor surveys a number of pieces of land of different areas that land surveyor must charge a fee as contemplated in subregulation 1 for each piece of land per area in square meters, for the total number of pieces of land surveyed.

(5) If in the survey contemplated in subregulation (4), one piece or more pieces of land exceed 2 hectares and the other piece or pieces of land are less than 2 hectares the land surveyor must charge a fee specified in the first column of Column 2 of Table B for the largest piece of land.

(6) Subject to regulations 6 and 11, a fee may not be charged for the survey of a road area for which registration as a separate property is not required and which is created in the survey of one or more pieces of land.

(7) A fee may not be charged for the survey of the outside figure represented on a general plan unless a diagram of that figure is required for registration, in which case the fees for the outside figure may be charged as a separate survey.

### **Location and replacement of beacons**

3. (1) For the location or replacement of beacons of a property in a township, fees are charged in terms of regulation 2, 12 or 15, whichever is less.

(2) For the survey of a property, where abnormal circumstances beyond the control of the land surveyor are present, the fees charged in terms of regulation 2 may be increased by a maximum of 85 percent but no fee may be charged in terms of regulation 14.

### **Official co-ordinate values**

4. The fees prescribed in regulation 2(1) must be reduced by 5 percent for each beacon, to which an official co-ordinate value has been assigned, but -

- (a) no reduction may be made when it is necessary to re-determine or to verify the position of that beacon; and
- (b) the total amount by which the fees are reduced may not exceed 50 percent.

### **Remaining extent**

5. If it is necessary to survey the remaining extent of a piece of land being subdivided in order to ascertain its area, all fees prescribed in regulations 2 and 4 apply to the area of that remaining extent as if it were one of the subdivisions.

### **Definition of a given area**

6. The fees for computing the position and placing of a beacon to define a given area that exceeds 2 hectares in extent are 10 percent of the fees prescribed in Table B in regulation 2.

### **Connections**

7. A land surveyor must charge the fees for connections as indicated, for the distance, in Table C, for each of -

- (a) the two distances between the two suitably situated beacons of the land being subdivided and two beacons of the subdivision, when no rectilinear boundary

of a subdivision coincides in whole or in part, with a boundary of the land being subdivided; and

- (b) the lengths of the two sides of the remaining extent along the boundary on either side of the subdivision as well as the co-ordinates of the corresponding terminals and the distances from such terminals or from the beacons of the subdivision on that boundary, when a rectilinear boundary of a subdivision coincides in whole or in part with a boundary of the land being subdivided,

but -

- (i) no distance may be charged for more than once;
- (ii) no fee may be charged if the desired information can be obtained from a previous survey;
- (iii) the fee must be charged once only when two or more contiguous subdivisions are surveyed at the same time;
- (iv) no fee may be charged for connections to terminal beacons if the positions for the connections to terminal beacons can be adopted from previous surveys; and
- (v) no fee may be charged when it is not prescribed that the connecting data must be shown on a diagram.

**TABLE C**

**Fees for connections**

<b>Metres</b>	<b>N\$</b>
50 and less	749
More than 50 but not more than 500	1 505
More than 500 but not more than 1 000	2 250
More than 1 000	2 250 plus N\$76 for every 100 metres or part of it in excess of 1 000 metres, with a maximum of N\$7 512.

**Curvilinear boundaries**

8. (1) A land surveyor must charge a fee of-
- (a) N\$276 for every 50 metres or part of every 50 metres, plus an initial fee of N\$562 for each subdivision of the land which is being surveyed and abuts on the high-water mark, when surveying the high-water mark of the sea;
- (b) N\$386 for every 50 metres of the river or part every 50 metres of the river plus an initial fee of N\$562 for each subdivision of the land, which is being surveyed and abuts on the curvilinear boundary, when surveying both banks of a river in order to determine the middle;
- (c) N\$191 for every 50 metres or part of 50 metres in addition to an initial fee of N\$562 for each subdivision of the land which is being surveyed and abuts on the curvilinear boundary, when surveying a curvilinear boundary, other than a curvilinear boundary referred to in paragraphs (a) or (b).

(2) A land surveyor may not charge a second time for the survey of a curvilinear boundary if the desired information can be obtained from a previous survey but a land surveyor may in accordance with regulation 15, charge for work that may be necessary to enable him or her to use information obtained from a previous survey.

### Diagrams, endorsements and prints

9. (1) Subject to regulation 2(3)(a)(iv), the fees which are charged for the preparation of a diagram are -

- (a) N\$373 for a diagram of six sides or less without co-ordinates and N\$20 for each additional side above six;
- (b) N\$486 for a diagram of six sides or less with co-ordinates and N\$28 for each additional side above six; and
- (c) for consolidated diagrams the fees prescribed in paragraph (a) or (b), and in addition N\$136 is charged for each component clause of the consolidation.

(2) A land surveyor must charge a fee of N\$136 for each servitude endorsement on a diagram or general plan.

(3) A land surveyor must charge a fee of N\$50 per 1 000 square centimetres or part of a 1 000 square centimetres for providing prints of diagrams suitable for registration.

### General plans

10. (1) Subject to regulation 2(3)(a)(iv), the fees which are charged for the preparation of a general plan are -

- (a) N\$3 064 for a general plan with a number of figures up to and including 10 figures;
- (b) N\$518 for every additional figure up to and including fifty additional figures; and
- (c) N\$140 for every additional figure above fifty additional figures.

(2) A land surveyor must charge a fee equal to the printing costs plus 50 percent of such printing costs for providing additional copies of a general plan suitable for registration purposes.

### Servitudes

11. (1) Subject to regulation 2(3)(a),(d),(e),(f) and (g) and regulations 7,12,13 and 14, the basic fee for the survey of existing visible power line is the amount indicated against the relevant distance in Table D.

**TABLE D**

Fees for surveying power line

Distance between consecutive bend points of power line in metres	N\$
20 and less	2 797
More than 20 but not more than 50	3 358
More than 50 but not more than 100	3 665

More than 100 but not more than 150	3 888
More than 150 but not more than 250	4 110
More than 250 but not more than 350	4 423
More than 350 but not more than 500	4 774
More than 500 but not more than 750	5 363
More than 750 but not more than 1 000	5 874
More than 1 000 but not more than 15 000	6 673
More than 1 500 but not more than 2 000	7 556
More than 2 000 but not more than 3 000	8 592
More than 3 000 but not more than 4 000	9 715
More than 4 000 but not more than 5 000	10 706
More than 5 000 but not more than 7 500	11 825
More than 7 500 but not more than 10 000	13 406
More than 10 000 but not more than 12 500	15 178
More than 12 500 but not more than 15 000	16 580
More than 15 000 but not more than 20 000	18 445
More than 20 000 but not more than 30 000	20 639
More than 30 000	20 639 plus N\$1 979 for every 10 000 metres or part of it in excess of 30 000 metres

(2) In the case of two or more adjacent power lines represented on the same servitude diagram a land surveyor must charge, for the survey of each additional line after the first line, a fee of N\$335 per bend for calculating the distances only plus N\$698 per bend for calculating the distances and beaconing the power line.

(3) A land surveyor must charge an additional fee of N\$773 for each property affected by the servitude for which a separate servitude diagram is required.

(4) In respect of all other property beacons necessarily determined during the course of the survey, the fee is as for the connection fees according to Table C in regulation 7 for the distance from each such beacon to the nearest power line bend point included in the survey.

(5) If the survey of a line is to be represented on a separate servitude diagram, the land surveyor must charge the fee prescribed in regulation 2 for the area of land in square metres, one side of which is equal to one quarter of the length of that line, but -

- (a) all other fees and reductions prescribed in these regulations apply as if the line to be represented on a separate servitude diagram represented one or more boundaries of a piece of land; and
- (b) the length of the line contemplated in paragraph (a) must be taken to be the distance between the property boundaries for which connecting data are normally considered necessary by the Surveyor-General.

(6) If two or more adjacent lines are represented on the same servitude diagram, the land surveyor must charge 35 percent of the fee prescribed in subregulation (5), for the survey of each additional line after the first line.

(7) The fees prescribed in regulation 2 apply to the survey involving the beaconing of a servitude area when it is essential to represent that area on a separate servitude diagram, but when that area affects more than one contiguous property, each section of that area which is necessarily beaconed is considered to be a separate piece of land.

(8) The fees contemplated in subregulations (5), (6) and (7) apply to a servitude combined with a subdivision and represented on a subdivisional diagram when that servitude lies outside the boundaries of the subdivision.

(9) A servitude combined with a subdivision and represented on a subdivisional diagram is considered to be an inherent part of that subdivision if that servitude lies within the boundaries of the subdivision and the fees prescribed in these regulations apply to the survey of that servitude, but all additional beacons necessarily placed to define the limits of the servitude, may be charged for as if they were additional sides.

(10) The fees prescribed in regulation 8 may be charged if the servitude concerned is defined by a curvilinear line.

(11) For servitude surveys for which the Surveyor-General has allowed the same procedures to be adopted which are prescribed for existing visible power line servitudes, the fees to be charged are the fees prescribed in subregulations (1), (2), (3) and (4).

### **Travelling, transport and subsistence**

**12.** (1) A land surveyor must charge a fee of N\$10.07 per kilometre for the forward and the return journey between that land surveyors headquarters and the site of the survey or from the place where that land surveyor was last employed to that site and onwards to other work, but that fee -

- (a) may be charged for only one completed journey with one vehicle, unless substantial reasons exist for additional journeys being made or additional vehicles being used; and
- (b) may not be charged for travelling and transport during the performance of a survey for which a basic fee is charged.

(2) A land surveyor may charge an additional fee, for the time occupied during the forward and return journeys between that land surveyor's headquarters and the site of the survey, for one land surveyor, one technical assistant and labourers being necessarily transported for the performance of the survey and unless a different prior written agreement has been entered into between the land surveyor and the client that additional fee is determined at a rate -

- (a) of N\$647 per hour in respect of that land surveyor; or
- (b) of 0,15 percent, per hour, of the gross annual remuneration in respect of a technical assistant or labourer.

(3) If free accommodation is not provided at the site of the survey, the land surveyor must charge travelling and transport expenses at rates prescribed in subregulations (1) and (2) in respect of one forward and one return journey per day between the site of the survey and -

- (a) his or her headquarters;
- (b) the nearest suitable accommodation; or
- (c) the free accommodation provided elsewhere by the client,

but -

- (i) the distance for which that fee is charged may not exceed 300 kilometres per day; and

- (ii) no fees may be charged in terms of this subregulation for the first day devoted to the survey.

(4) If accommodation is supplied by the land surveyor away from his or her headquarters, that land surveyor may charge N\$1 054 per day for himself or herself and for each technical assistant and N\$820 per day for each of his or her labourers unless a prior written agreement has been entered into between that land surveyor and the client that that land surveyor may recover his or her actual expenses.

### Line clearing

**13.** (1) If it is essential for the performance of a survey that vegetation be cleared, the land surveyor must charge a fee of N\$652 per hour for the time necessarily spent by that land surveyor solely on supervising the clearing, but -

- (a) that land surveyor must ensure that the clearing is done as economically and expeditiously as possible; and
- (b) if practicable, the client must be afforded the opportunity of having the necessary clearing done and supplying the necessary labour.

(2) The cost of labour supplied by the land surveyor for the clearing may be recovered from the client.

### Abnormal circumstances

**14.** (1) The fees prescribed in Table B and subregulation (3)(b), (m) and (n) of regulation 2, regulations 5, 6, 7, 8, 11 and 12(1), in the case of surveys in the registration divisions mentioned in Column 1, are increased by the percentages mentioned opposite in Column 2 -

COLUMN 1	COLUMN 2
Registration Division	Percentage increase
A	20%
B	35%
D	15%
J	15%
L	15%

(2) In the survey of pieces of land in an existing township, the fees prescribed in Table A in regulation 2, for those pieces of land upon which one or more buildings have been erected, may be increased by N\$1 512 or 60 percent of the relevant fees so prescribed, whichever is the lesser.

### General

**15.** The fees for professional work not provided for elsewhere in these regulations are as follows:

- (a) a fee of N\$925 per hour may be charged, but where an approved society representing professional land surveyors or technical surveyors or survey technicians has set a tariff for the work in question, a fee must be charged in accordance with that tariff but that fee may not exceed N\$925 per hour;
- (b) the following costs may be recovered by a land surveyor:

- (i) N\$10.07 per kilometre in respect of motor transport supplied by that land surveyor during the performance of a survey;
- (ii) the amount of disbursements for beacon material;
- (c) an amount per hour or part of an hour, which is equal to 0,15 percent of the gross annual remuneration of technical assistants or labourers employed for the work in question may be charged; and
- (d) a fee per day or part of the day, may be charged by a land surveyor for appropriate equipment employed for the work and must be calculated by applying the replacement value of the equipment and current commercial prime lending rates and linearly interpolating the relevant amounts in Table E.

**TABLE E****DAILY RATES TO BE CHARGED FOR EQUIPMENT**

Replacement Value of Equipment	Current Prime Commercial Lending Rates				
	10%	15%	20%	25%	30%
Daily Rates	N\$	N\$	N\$	N\$	N\$
0	0	0	0	0	0
5 000	22	24	27	29	32
10 000	44	48	53	58	64
15 000	66	73	80	87	95
20 000	88	97	106	117	127
25 000	110	121	133	146	159
