TRADE MARKS	1

APPLICATIONS FOR REGISTRATION OF TRADE MARKS IN NAMIBIA

(Applications accepted in terms of Act No. 48 of 1973)

Any person who has grounds for objection to any of the following trade marks, may, within the prescribed time, lodge Notice of Opposition on form SM 6 contained in the Second Schedule to the Trade Marks Rules in Namibia, 1973. The prescribed time is two months after the date of advertisement. This period may on application be extended by the Registrar. Where the Gazette is issued late, the period of opposition will count as from the date of issue and a notice relating thereto will be displayed on the public notice board in the Trade Marks Registry.

Formal opposition should not be lodged until after notice has been given by letter to the applicant for registration so as to afford him an opportunity of withdrawing his application before the expense of preparing the Notice of Opposition is incurred. Failing such notice to the applicant an opponent may not succeed in obtaining an order for costs.

“B” preceding the number indicates Part B of the Trade Mark Register.

Neither the office mentioned hereunder nor Windhoek Printers & Publishers (Pty) Ltd., acting on behalf of the Government of Namibia, guarantee the accuracy of this publication or undertake any responsibility for errors or omissions or their consequences.

**PHILLIP FREDERICK LOCK STRAUSS
PUMPING ARRANGEMENT.**

A pump unit includes a housing defining a chamber; a first cylinder provided in the housing and extending through both end covers of the housing; a first one-way valve provided at one end of the first cylinder; a second one-way valve provided at the other end of the first cylinder; at least one first aperture in the first cylinder leading into the chamber; a second cylinder provided in the housing; a piston rod extending through the second end cover of the housing into the second cylinder; a piston attached to the piston rod; at least one second aperture leading into the second cylinder from the chamber so that movement of the piston away from such second aperture(s) suction of liquid through the first one-way valve into the first cylinder, whilst the second one-way valve is closed, and movement of the piston in an apposite direction causes closure of the first one-way valve and opening of the second one-way valve for displacing liquid from the second cylinder through the second one-way valve to be discharged via a discharge pipe.
